

†*Aethocephalichthys hyainarhinos* gen. et sp. nov., a new and enigmatic Late Cretaceous actinopterygian from North America and New Zealand

Christopher FIELITZ, J. D. STEWART & Joan WIFFEN

Abstract

A new actinopterygian, *Aethocephalichthys hyainarhinos* gen. et sp. nov., is described. It is Late Cretaceous in age and found in the Niobrara, Eutaw, and Pierre Shale formations of North America, and in the Maungataniwha Sandstone Formation of New Zealand. Almost all specimens consist solely of the neurocranium. It is rectangular in shape with a blunt snout and characterized by the fusion of all the bones of the neurocranium. The bones of the roof and snout are covered with a dermal pattern of polygons, many of which have a central pore. Each pectoral fin-ray has a shallow channel with pits along the channel. This species shares a number of primitive characters with various actinopterygian groups such as an ossified interorbital septum. Potential characters that could place *Aethocephalichthys* within the teleosts are inconclusive due to the bone fusion. These include a deep posterior myodome and an unpaired vomer. We conclude that this fish is an incertae sedis actinopterygian.

Introduction

The worldwide record of Late Cretaceous marine fishes is well documented (WOODWARD 1901, ARAMBOURG 1954, RUSSELL 1988). Identification of that fossil material is often a different matter. As listed by RUSSELL (1988), there are a number of North American localities that yield fossil-fish remains, but these are very poorly preserved fossils and cannot be identified beyond high taxonomic levels. There are also those specimens that defy identification despite being moderately well preserved. These lack the characters that allow them to be assigned to a particular taxonomic group. *Aethocephalichthys hyainarhinos* is an example of a species that is both poorly preserved and lacks characters to allow it to be assigned to a taxonomic group. It has been found at several Late Cretaceous localities in North America and in New Zealand. To date, specimens of *A. hyainarhinos* consist mostly of neurocrania. Numerous collectors have encountered this species in the Pierre Shale (L. D. MARTIN pers. comm.), but despite the large number of specimens collected, it has remained undescribed until now.

Localities and biostratigraphy

New Zealand: Neurocranial specimens are found at the Mangahouanga Stream fossil site which is a tributary of the Te Hoe River, west of Hawke's Bay (Fig. 1A). The Maungataniwha Sandstone Formation is Upper Piripauan to Lower Haumurian in age. This is equivalent to Santonian to Maastrichtian ages of North America and Europe. The boundary between uppermost Piripauan and lowermost Haumurian is not clear. The formation represents a near-shore, shallow-water environment such as a bay. A nearby delta is suggested by the preservation of terrestrial plants and animals (CRAMPTON & MOORE 1990).

Initially, the neurocranial specimens were found in the rocks of the conglomeratic facies of the Maungataniwha Sandstone. The neurocrania are incomplete fragments, and most are found in calcareous and phosphatic concretions. Other fossils found in this formation consist of a mixture of marine and terrestrial organisms. Marine organisms include bivalves, such as *Inoceramus*, and other mollusks, such as ammon-

Availability

Generally all our publications are available as PDF files; full publications as a general rule after the printed version is out of print. If you have questions concerning particular contributions please contact us by e-mail:
pdf@pfeil-verlag.de.

The PDF files are protected by copyright.

The PDF file may be printed for personal use. The reproduction and dissemination of the content or part of it is permitted. It is not allowed to transfer the digital personal certificate or the password to other persons.

Prices

Books: Prices are to be found in the catalog.

Articles in journals and single contributions or chapters in books:

10 EURO basic price per order (including the first 10 pages),
and

0,50 EURO per page, beginning with the 11th page.

Page numbers are found in the contents of the publications.

Orders

Use our order form for PDF files or send your order informal per e-mail (pdf@pfeil-verlag.de). The only accepted payment is by credit card. While using the order form for PDF files, your data will be transmitted by secure link (ssl). You also may send the informations informally by e-mail, fax, phone or mail.

Handling

As soon as possible, depending on our business hours and your order, you will receive your PDF file together with the certificate and password by e-mail.

Larger PDF files can be downloaded from our webspace, if necessary.

Your invoice will be sent out by e-mail after we charged your credit card.

To open the encrypted PDF files you have to install your personal certificate after your first order. All PDF files with the same certificate can be opened from that time on.

Dieser Beitrag kann als PDF-Datei erworben werden.

Verfügbarkeit von PDF-Dateien

Prinzipiell sind von allen unseren Publikationen PDF-Dateien erhältlich. Komplette Publikationen in der Regel erst nachdem die gedruckte Version vergriffen ist. Anfragen bezüglich bestimmter Beiträge richten Sie bitte per E-Mail an pdf@pfeil-verlag.de.

Die PDF-Dateien sind urheberrechtlich geschützt.

Ein Ausdruck der PDF-Dateien ist nur für den persönlichen Gebrauch erlaubt.

Die Vervielfältigung von Ausdrucken, erneutes Digitalisieren sowie die Weitergabe von Texten und Abbildungen sind nicht gestattet.

Das persönliche Zertifikat und das Passwort dürfen nicht an Dritte weitergegeben werden.

Preise

Bücher: Die Preise sind dem Katalog zu entnehmen. Zeitschriftenbeiträge und einzelne Kapitel aus Sammelbänden bzw. Büchern:

10 EURO Grundbetrag pro Bestellung (einschließlich der ersten 10 Seiten),
und

0,50 EURO pro Seite ab der 11. Seite.

Den Umfang der Beiträge entnehmen Sie bitte den Inhaltsverzeichnissen.

Bestellungen

Bestellungen sind mit dem PDF-Bestellformular oder formlos per E-Mail (pdf@pfeil-verlag.de) an uns zu richten. Die Bezahlung ist ausschließlich per Kreditkarte möglich. Bei Verwendung unseres Bestellformulars werden die Kreditkartendaten über eine gesicherte Verbindung (ssl) übermittelt. Sie können die Daten aber auch formlos per E-Mail, Fax, Post oder telefonisch übermitteln.

Abwicklung

So bald wie möglich, aber abhängig von unseren Bürozeiten und der gewünschten Bestellung, schicken wir Ihnen die PDF-Datei(en) zusammen mit Ihrem persönlichen Zertifikat und dem zugehörigem Passwort per E-Mail. Größere Dateien bieten wir Ihnen gegebenenfalls zum Herunterladen an.

Der fällige Betrag wird von Ihrer Kreditkarte abgebucht und Sie erhalten die Rechnung ebenfalls per E-Mail.

Um die verschlüsselten PDF-Dateien öffnen zu können, muss bei der ersten Bestellung das passwortgeschützte persönliches Zertifikat installiert werden, welches anschließend auf dem Rechner verbleibt. Alle mit diesem Zertifikat verschlüsselten Dateien können anschließend auf diesem Rechner geöffnet werden.
